Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/17/06 has been entered.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-4, 6-12, 14-15, 17-18 and 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurita (6,073,260) in view of Sumita et al (US 2004/0004888).

Art Unit: 2138

As per claims 1-4, and 6-8, Kurita discloses a system for testing devices, comprising:

A first device (1) for test;

A second device (3) for test coupled to the first device in a scan chain; and Signal selector (13) for selecting between an output signal that is output from the first device and a bypass that has bypassed the first device. (See Figure 4, col. 5, lines 26-57). Kurita does not disclose the selecting depending on whether the signal selector detects power in a first rail coupled to the first device. However, Sumita et al disclose that selecting depending on whether the signal selector detect power in the first device (paragraph (0066)). Therefore, it would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to incorporate the power supply of Sumita et al into the selector circuit of Kurita so that the selector selecting output signal that is pass or bypass the first device depending on the power supply to the circuit for test that is high or low.

As per claims 9-12, 14-15, 17-18 and 20-23, these claims are rejected under similar rationale as set forth in claims 1-4 and 6-8.

- 4. Applicant's arguments with respect to claims 1-4, 6-12, 14-15, 17-18 and 20-23 have been considered but are most in view of the new ground(s) of rejection.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Friday.

Application/Control Number: 10/607,159

Art Unit: 2138

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on 571-272-3819. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
